

Anti-HAT Rabbit pAb

WL05186

For Research Use Only. Not For Use In Diagnostic Procedures

Product Information

Product name	Anti-HAT Rabbit pAb	
Source	Rabbit	
Species reactivity	Human, Mouse, Rat	
Tested applications	WB	1:1000-1:2000
Pack size	50/100/200/500/1000µl	
Storage	Store at -20°C. Avoid freeze/thaw cycles.	
Storage buffer	Supplied in 20 mM phosphate (pH 7.5), 150 mM NaCl, 100 µg/ml BSA, 50% glycerol and less than 0.02% sodium azide	

General Information

Background This gene is a type B histone acetyltransferase (HAT) that is involved in the rapid acetylation of newly synthesized cytoplasmic histones, which are in turn imported into the nucleus for de novo deposition onto nascent DNA chains. Histone acetylation, particularly of histone H4, plays an important role in replication-dependent chromatin assembly.

Immunogen Polyclonal antibody is produced by immunizing animals with a synthetic peptide of HAT.

Purification Polyclonal antibody was purified by Protein A affinity chromatography.

Western blot-Anti-HAT pAb

Lane 1: Human HEK-293 cell lysate e
 All lanes: Anti-HAT at 1:1000 dilution
 Lysates/proteins at 20-50 µg per lane.
 Predicted band size: 49 kDa
 Observed band size: 49 kDa
