## General Information

**Background** FAM107A, also named as TU3A, encodes a 144 amino-acid protein, which contains a coiled-coil domain and a nuclear localization signal. FAM107A as a transcription factor regulates some gene transcription and signal transduction in cell. With the exception of peripheral blood cells, FAM107A is widely expressed in normal tissue.

**Immunogen** Polyclonal antibody is produced by immunizing animals with a synthetic peptide of FAM107A.

**Purification** Polyclonal antibody was purified by immunogen affinity chromatography.
