General Information

Background

The SER/THR protein kinase encoded by this gene belongs to the Cdc5/Paolo subfamily. It is highly expressed during mitosis and has been found to be elevated in many different types of cancer. The depletion of this protein in cancer cells greatly inhibits cell proliferation and induces apoptosis. Therefore, it is a target for cancer treatment.

Immunogen

Polyclonal antibody is produced by immunizing animals with a synthetic peptide of P-PLK1 (S326) .

Purification

Polyclonal antibody was purified by Protein A affinity chromatography.
