General Information

Background TLE1 (Transducin-like enhancer protein 1) is a transcriptional corepressor and binds to a number of transcription factors. Involved in negative regulation of I-kappaB kinase/NF-kappaB signaling; negative regulation of anoikis; and regulation of gene expression. Located in cytosol and nucleoplasm.

Immunogen Polyclonal antibody is produced by immunizing animals with a synthetic peptide of TLE 1.

Purification Polyclonal antibody was purified by Protein A affinity chromatography.
